Oregon-Idaho Utilities, Inc.  
2015 Progress report on 5Yr. Service Quality improvement plan  
Program Year 2016

This document is an integral part of the Company's 2015 Annual Report, as attached to Form 481. It is in compliance with §54.313(a)(1) adopted in the FCC's USF/ICC Transformation Order (11-161) and incorporates all further clarifications identified in subsequent Reconsideration Orders, as applicable, that were in effect at the time the Annual Report was submitted to the requisite regulatory authorities. Questions about this report should be submitted to Doug Musgrave, Manager, at (208) 461-7802 or by e-mail at [doug.musgrave@oiutelecom.net](mailto:doug.musgrave@oiutelecom.net).

Oregon-Idaho Utilities, Inc. is a small, rural, privately owned Independent Local Exchange Carrier operating in the states of Oregon and Idaho. OIU is headquartered at 1023 N. Horton St., Nampa, Idaho 83651. We are Oregon and Idaho State Public Utilities Commissions certificated and an Eligible Telecommunications Carrier throughout our authorized service areas in Oregon and Idaho. We are a NECA member company and receive high cost support through Federal and State Universal Service mechanisms.

Oregon-Idaho Utilities advises that the environment in which the Company operates is dynamic, not static. As a result, certain network targets identified in our initial 5 Year Network Improvement Plan filed in 2014 may be modified in response to the fast changing regulatory environment at both the Federal and State levels. The feasibility of each project must be regularly reviewed giving consideration to its implications upon the Company's financial viability in addition to their impacts on our capability to provide required services and maintenance of service quality. When a project is no longer viable because of financial, technological, or vendor related reasons, less costly alternatives of achieving the desired service improvement may be examined. Targets not met or that have changed since the initial 5 Year Plan Filing are identified and reasons provided for those changes.

According to USAC, year to date thru the end of May 2015, OIU has received a total of \$790,447 in Federal Support. The receipt of that support can be broken down by category as follows:

High Cost Loop Fund	\$399,544
Safety Net Additive	\$ 7,450
Local Switching Support	\$ 0
CAF-ICC Support	\$176,616
ICLS	\$206,837

Universal Service Support funds are used to maintain, upgrade, and improve the Company's network, cover operating expenses and debt commitments as necessary to permit it to offer a high level of service for both voice and broadband within our authorized study area. USF Support will continue to be included in the Company's current revenue accounts and forward-looking projections. Revenues, in the aggregate, are used for both capital expenditures and to cover operating expenses and fixed costs incurred to obtain capital from lenders. The Company does not segregate USF separately for purposes of tracking its use to cover capital and operating expenditures; USF is expended in the same proportion as its contribution is to the Company's aggregate revenue amount.

The preparation of financial data for the company can take several weeks beyond the close of the financial period. At the preparation of this report, complete financial data had been compiled and

prepared through the end of April 2015. As of April 2015 the proportionate share of USF expenditures to date for 2015 is estimated by the company as follows:

CAPEX \$7,904                      OPEX \$782,543

In the USF/ICC Transformation Order the FCC determined that rural rate of return carriers are only required to extend broadband capabilities within their areas in the existence of a reasonable request for service by a prospective broadband customer. In the Seventh Order of Reconsideration, the FCC clarified the circumstances which constitute a reasonable request. Further section 67 clarifies that a request is considered unreasonable if it required the carrier to undertake plant improvements merely for the purpose of providing a new broadband service if such improvements would likely force the carrier above the \$250.00 per line monthly cap or if the carrier were already experiencing support reductions as a result of that cap.

The 5 Year Plan submitted by OIU as a part of our Project Year 2015 Annual Report was created prior to the FCC's clarification of a reasonable request. As a result, the projects mentioned in that 5 year plan did not take into account that OIU is and has experienced support reductions as a direct result of the \$250.00 per line monthly cap since the cap was enacted. All projects considered for construction by OIU must weigh the potential benefits against the financial impact of the undertaking. Following is a description of the broadband expansion projects that were planned for calendar year 2015.

#### South Mountain Exchange DSLAM project – Program Year 2016

This project encompasses the placement of additional fiber optic facilities and the addition of a new DSLAM site in the Pleasant Valley Exchange of Idaho to extend coverage of 4/1 broadband service to 9 customers along South Mountain Road and increase voice service quality by shortening the voice loops. Two of the nine customers have expressed interest in receiving broadband service in the past if it were available but it is not practical to build a project that only serves part of the available customers in an area. The estimated cost of this project was approximately \$22,000.00 per customer and the project will only allow a maximum of 4/1 capabilities to all but two of the households in the build area. The costs of this project are prohibitive notwithstanding the \$250.00 per line monthly cap. This project has been placed on indefinite hold.

#### Upgrade Existing FTTP Systems Jordan Valley Exchange – Program Year 2016

This project involved hardware and software upgrades to our existing FTTP systems in the Jordan Valley, Oregon Exchange. As this FTTP system ages, it requires certain upgrades that are necessary to keep the system operational, this is a service Quality Issue. This project is still scheduled for the latter half of 2015 and will be scaled back to save costs where practical. The project is estimated to cost less than \$25,000.00 to complete and will affect approximately 20 voice and or broadband customers.

#### All Exchanges – Program Year 2016

Oregon-Idaho Utilities is in progress of performing software upgrades at our existing DSLAM locations that will allow us to utilize VDSL technologies. This project is an upgrade to increase capacity and improve coverage with higher rate broadband speeds to our existing broadband customers in our attempt to keep pace with the rapidly increasing broadband transfer rates mandated by federal regulators. The cost of these upgrades is estimated to be less than \$8,000.00 total and will affect all OIU broadband customers. In addition we are in the process of increasing the bandwidth of our middle mile and upstream provider links to maintain service quality to our existing customers. These projects were not planned in the 2015 5 year plan but have become necessary for OIU to remain a viable provider of broadband services to all of our customers.

Capabilities currently exist to provide 4 Mbps downstream and 1 Mbps upstream broadband service to all known community anchor institutions within the OIU Study Area. No new broadband services were installed to community anchor institutions in the OIU study area in fiscal year 2014.

#### Line 510 Service Quality Standards & Consumer Protection Rules Compliance

Oregon-Idaho Utilities, Inc. complies with the service quality standards in the State of Oregon as defined under OAR 860-034-0390 Retail Telecommunications Standards for Small Telecommunications Utilities. Oregon-Idaho Utilities, Inc. complies with the service quality standards in the State of Idaho as defined under IDAPA 31.41.01 The Telephone Customer Relations Rules. Supervisory personnel periodically monitor activities and information about customer service orders and trouble reports in these states to insure service quality standards are being followed. Frequent interaction between supervisors and field and customer service staff helps to insure that each employee understands their role in following these standards.

Oregon-Idaho Utilities, Inc. complies with all applicable requirements on consumer protection rules including OAR 860-034-0390 Retail Telecommunications Standards for Small Telecommunications Utilities in the State of Oregon, IDAPA 31.41.01 The Telephone Customer Relations Rules in the State of Idaho, 47 CFR Part 64 Subpart U, Customer Proprietary Network Information, and the Federal Trade Commission Red Flag Rules. Employee training is held yearly on the requirements of each of the above as well as general training on disclosure of customer information to unauthorized parties. Supervisory personnel periodically monitor the activities of field and customer service personnel for compliance.

## Line 610 Functionality in Emergency Situations Description

Oregon-Idaho Utilities, Inc. has engineered our communications network to remain functional in emergency situations as required by applicable state and federal regulations. Main Central office sites have emergency power generators that run automatically in the event of a commercial power loss. In addition, these sites have battery backup which will allow them to remain functional in the event of a loss of generator power. Second tier remote switch sites and remote concentrator sites have battery backup to continue operation in the event of a commercial power loss and the company has an inventory of portable generators which can be manually deployed to remain operational during extended commercial power loss events. Our class 5 switch and second tier remote sites have emergency stand alone capabilities to continue operation during an isolation event. All main switch, second tier remote switch, and remote concentrator sites have redundant transport paths allowing them to re-route traffic in the event of an emergency.

All switching, concentrator and transport equipment have redundant critical systems to continue operation during an internal card failure. We maintain a Rural Utilities Service recommended standard set of spare cards and parts in house for all mission critical systems. Routine maintenance is conducted on all mission critical systems. OIU also has an automated alarm monitor system in place that alerts company personnel of system malfunctions 24 hours a day, 7 days per week, 365 days per year. Our network was engineered to exceed generally accepted traffic handling standards within the industry to assure continued operation during traffic spikes and during busy hour and busy day events.

## Line (1210) – Terms & Conditions of Voice Telephony Lifeline Plans

Oregon-Idaho Utilities does not have any service offerings specific to low income subscribers. Discounts to local service rates are available to qualified low income subscribers through the lifeline assistance program. Oregon-Idaho Utilities offers flat rate local service that includes unlimited calling within the defined local calling area, with access to 911 service, operator services, directory assistance, and Interexchange carriers. Oregon-Idaho Utilities does not offer toll service to our subscribers.

The below media ad was printed on a quarterly basis in The Argus Observer and The Owyhee Avalanche during 2014 informing the public, including those eligible for Lifeline, the availability of Oregon-Idaho Utilities telephone service.

### **OREGON-IDAHO UTILITIES, INC.**

Wishes to inform the public of the availability of its telephone services which are offered in rural portions of Harney County, Malheur County, Oregon and Owyhee County, Idaho.

Oregon-Idaho's local service area includes the Oregon exchanges of Jordan Valley (prefix 541/586), Adrian (541/724) and Ridgeview (541/339) and the South Mountain (208/583) exchange in Idaho. Monthly service rates within these areas vary, depending on service location, and range from:

**\$11.65 to \$20.05 plus \$6.50 federal end user charge for residential service, and**

**\$23.35 to \$34.85 plus \$6.50 federal end user charge for single line business service.**

These rates include unlimited calling within the defined local areas, access to 911 services, access to operator services and directory assistance, and interexchange carrier access.

Low income individuals eligible for the Lifeline and Link-up assistance programs may be eligible for discounts from these basic service rates through the Oregon and Idaho telephone assistance programs and may also receive toll call blocking service without charge.
